

WHAT'S GOING ON WITH DAVID CASSIDY?

You could almost think that teenybopper idol Cassidy is a fait accompli and that the predictions of certain 'Cassidy haters' that it would just be a flash in the pan are slowly but surely coming true! We just can't believe it, but... What's going on with David Cassidy? Or rather, with his fans? To give just a few examples: our Dutch colleagues were inundated with thousands and thousands of letters adorned with languishing lipstick mouths and carefully painted hearts from gushing, enamoured, loving, head-over-heels Cassidy admirers just a quarter of a year ago and what's going on at the moment? Nothing, nothing at all! Where have they gone? And how are things in England at the moment?

The birthplace of pop music is currently being swept by a huge wave of Osmonds. There is hardly any talk of Cassidy any more! The situation is similar in the States! Where has David Cassidy gone? Why did his fans have to wait so long for him to finally turn up with a new record? Why was it quiet around David for so long? Well, he finished recording the TV series 'The Partridge Family' and recorded a new LP. He's changed managers and a new single has just been released, and yet... the energy has faded, the enthusiasm gone. Is the dream prince David Bruce Cassidy over? And his German fans? It would be really sad if you also dropped your idol, as the others seem to have done. Well, time will tell!
